

PHOTO HIDES SWEDEN – SPECIES LIST

This species list has been compiled from personal observations at the hides and reports from other visitors to my photo hides. Please note that the frequency of visits to the hides is an estimate.

Birds:

- Brambling (*Fringilla montifringilla*) – Ranges from rare to frequent during the migration period in spring.
- Common Raven (*Corvus corax*) – A frequent visitor during winter and very frequent in spring.
- Coal Tit (*Parus ater*) – A very frequent visitor, especially during autumn, winter, and spring.
- Crested Tit (*Lophophanes cristatus*) – Not a particularly frequent visitor to this hide. However, it is very frequent and one of the highlights at the forest hide.
- Eurasian Blackbird (*Turdus merula*) – A very frequent visitor year-round.
- Eurasian Blue Tit (*Cyanistes caeruleus*) – A very frequent visitor year-round.
- Eurasian Bullfinch (*Pyrrhula pyrrhula*) – Generally a frequent visitor, mainly at the hide during the winter period.
- Eurasian Green Woodpecker (*Picus viridis*) – A rare visitor.
- Eurasian Jay (*Garrulus glandarius*) – A very frequent visitor, mainly during autumn, winter, and spring.
- Eurasian Magpie (*Pica pica*) – A frequent visitor, especially during autumn, winter, and spring.
- Eurasian Nuthatch (*Sitta europaea*) – A very frequent visitor year-round.
- Eurasian Red Squirrel (*Sciurus vulgaris*) – Often seen at the bird feeders.
- Eurasian Treecreeper (*Certhia familiaris*) – A very frequent visitor, especially during the winter period, early spring, and late autumn.

- European Robin (*Erithacus rubecula*) – A frequent visitor, especially during autumn, winter, and spring.
- Great Spotted Woodpecker (*Dendrocopos major*) – A very frequent visitor year-round.
- Great Tit (*Parus major*) – A very frequent visitor year-round.
- Hawfinch (*Coccothraustes coccothraustes*) – Frequent during the migration period in spring.
- Marsh Tit (*Poecile palustris*) – A very frequent visitor, especially during autumn, winter, and spring.
- Willow Tit (*Poecile montanus*) – A very frequent visitor, especially during autumn, winter, and spring.
- Yellowhammer (*Emberiza citrinella*) – A very frequent visitor year-round.

Raptors:

- Buzzard (*Buteo buteo*) – A very frequent visitor during late autumn, winter, and spring.
- Goshawk (*Accipiter gentilis*) – A very frequent visitor during late autumn, winter, and spring.

Mammals:

- Eurasian Badger (*Meles meles*) – Resident of the area but not likely seen in the season for goshawks.
-
- Pine Marten (*Martes martes*) – Appears occasionally; not a certain species, ongoing project.
-
- Red Fox (*Vulpes vulpes*) – In some years, the dens are visited by red foxes.
-
- Eurasian Red Squirrel (*Sciurus vulgaris*) – Often seen at the bird feeders.
